Wehlers dining table, Denmark, is launching during 3 Days of Design June 1st -3rd. 2017. The Wehler dining table is called 'Denmark', because of its Danish design & Danish manufacturing.

"I have designed a great table for use in private homes and in public spaces. The base is solid stainless steel and the top is with a linoleum finish. The materials will tell the story of use over time and become more beautiful over the years.
With this table I am sure long conversations and laughter are a given"

About the Designer
Born in Lusaka, Zambia in 1972, Toke Lauridsen has been educated as stainless steel smith in Denmark to finally open his own workshop in 2007 at "Kødbyen", the old Meatpacking District of Copenhagen and thriving creative cluster. Needles to say his all-time favorite design material is steel – and Toke has acquired a great sense of it through all his maker's activity. Concentrating on one material brings a high focus to the job – Toke's designs are as simple as possible, almost ascetic, delicate, yet strong and industrial – with no unnecessary elements. He likes to utilize the features of steel to the fullest to bring out the best possible forms, achievable only due to the material he's working with.

About Wehlers
Wehlers offers sustainable furniture to the thoughtful consumer who refuses to compromise on design and sustainability. Wehlers insists on circular economy, local Danish craftsmanship, and we are on a mission to change the industry. Wehlers has designed an intelligent ecosystem and take back their furniture after 'end of life-cycle.
